

Segmented end cap without a gasket

Dimensions

Description

The end cap is made of segments. The end cap has a male end inserted into the duct to blind and seal its end. The class of air tightness can be improved by wrapping the end cap joint and the screws or rivets used to fasten it to the duct with the sealing tape.

Available materials — Product code example

- galvanized steel sheet
- 1.4301/304 stainless steel sheet
- 1.4404/316L stainless steel sheet, molybdenum-enriched
- AW-1050A H24 aluminium sheet
- M1E z4 copper sheet
