

## Aluminium sealing tapes

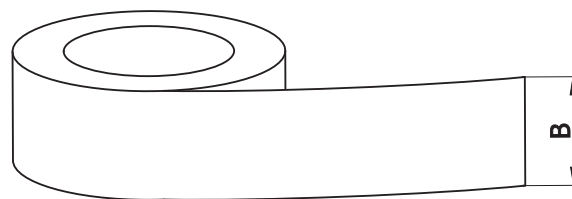

### Description

The aluminium sealing tape improves the air tightness of the ductwork joints in HVAC systems. The sealing tape is available in 50-metre and 10-metre reels, 50, 75 and 100 mm wide. Three basic sealing types for HVAC systems are available. The temperature resistance depends on the type of sealing tape as shown in the table below.

30-micron aluminium tape for sealing ventilation ducts at air tightness class A or B according to Eurovent's requirements. The acrylic glue provides excellent tack and permanent bonding strength.

### Dimensions

Product code	width B (mm)	length (m)	package (pcs)	min. temp. (°C)	max. temp. (°C)
-50-50	50	50	24	-20	+120
-75-50	75	50	16	-20	+120
-100-50	100	50	12	-20	+120
-50-10	50	10	272	-20	+120

thickness: 30 microns
